Full Stack & Automation Engineer | GH L • Zapier • Make • AI Integrations

Professional Summary

Automation-focused Full-Stack Engineer with 10+ years of experience building end-to-end systems, workflow automations, and data integrations. Skilled in optimizing client pipelines, dashboards, and reports across tools like **GoHighLevel (GHL), Zapier, Make (Integromat), n8n, and API-based systems**. Proven track record of improving operational efficiency, reporting accuracy, and lead management automation. Adept at leveraging light coding (Python, JavaScript) to extend GHL capabilities and build custom integrations.

Core Skills

Automation & Integration: GoHighLevel, Zapier, Make (Integromat), Eliza, n8n, API development

Programming: Python, JavaScript, TypeScript

Backend: FastAPI, Django, Node.js, Express.js, REST APIs, GraphQL

Frontend: React, Next.js, Vue.js

Data & Reporting: PostgreSQL, MongoDB, Power BI, Snowflake

AI & Workflow Optimization: LangChain, GPT-4, Llama2, AI chatbots, pipeline automation

Tools: AWS, Docker, Git, Jenkins

Relevant Experience

Automation & Integration Engineer (AI & GHL Systems)

AutomateMileMaker | Remote | Jan 2023 – Oct 2024

Built automated client pipelines and dashboards within **GoHighLevel**, increasing lead tracking efficiency by 30%.

Integrated **Zapier, Make, and API workflows** to sync client data across CRMs and reporting tools.

Designed **custom GHL automations** for onboarding, follow-ups, and lead nurturing sequences.

Reduced manual processes by 40% through n8n and Python-based automation.

Enhanced reporting dashboards, boosting visibility into team performance and client conversions.

Tech: GoHighLevel, Zapier, Make, n8n, Python, React, FastAPI

GenAI Developer / Automation Specialist

Cognistx | Remote | Jul 2019 – May 2022

Connected AI-powered chatbots and dashboards to **CRM systems** for automated client updates.

Built integrations with **third-party APIs** and internal databases to centralize marketing analytics.

Created automation pipelines that increased operational efficiency by 25%.

Optimized performance reporting and automated alert systems via Zapier and internal APIs.

Tech: Django, Nest.js, Zapier, Python, Stable Diffusion

Backend & Data Engineer (Automation Pipelines)

JPMorgan Chase | Remote | Oct 2015 – Jun 2019

Developed **ETL automation systems** for reporting and analytics (cut manual workload by 60%).

Managed integrations between AWS, Snowflake, and Power BI for real-time dashboards.

Automated backend workflows, improving data accuracy and reducing manual sync tasks.

Tech: Python, FastAPI, Django, Snowflake, Power BI, AWS

Education

Bachelor of Computer Science

Hoa Sen University | Vietnam

Additional Expertise

GoHighLevel workflow building & troubleshooting

CRM pipeline design and optimization

Zapier / Make automation architecture

AI assistant & chatbot integration (OpenAI, LangChain)

Dashboard & performance reporting automation
